

IJAMinecraft

IJAMinecraft is about 19 years old and lives in Germany. He makes money by creating minecraft creations in one command.

IJAMinecraft is a help to the Minecraft world by making gameplay better and inspiring other other player. As a popular youtuber he has to keep posting and creating. He creates one commands that add items into their Minecraft world. They can be helpful or damage the world around them can make the world a challenge. Not only does he create these one commands he also creates maps for people to play on such as square blocks.

IJAMinecraft is great at inspiring people he manages to create one command creations and still provides all the tools for them to make their own creations he's not just in it for the fame. He loves what he does and is very good at it, the more he makes the more people want to do that themselves so really he's not just some fancy German dude that sits on his butt and makes money off of it he also gives people inspiration.

And IJAMinecraft has an interactive website where you can check out his latest post and submit request for commands so he loves his fans so much that he will spend 10s of hours of work just for them that seems pretty cool to me.

So in a summary this guy spends most of his time to make his subscribers happy, inspires a lot of people to create thing and do what he does. But the real question is why would someone like him end up spending hours on a keyboard typing command for people to enjoy, because he loves to make people happy.
