

Show your work in this column.	Write answer in this column. Round to the nearest 100th.
<p>2. What is your total time (in hours) spent traveling just during the school week, Monday through Friday?</p>	
<p>3. Compute the average time that you spend traveling per day during the school week by dividing the total amount of time by the number of days.</p>	
<p>4. Determine how many hours there are from the time you wake up until you go to bed on an average school day. Be sure to write down what time you wake up and go to bed.</p>	
<p>5. Use the above answer to compute the percentage of your waking time that you spend traveling, on average, every school day. (time traveling \div total time awake \cdot 100 = percent)</p>	
<p>6. Home connection: Ask a parent how much time he or she spends in a car on an average day during the work week.</p>
