• First Class Project -Sandwich

Working with layers, masks and cropping in PhotoShop.

The objective of this project is to obtain a better understanding of **Photoshop Layers** by creating the layers of a sandwich on a plate. Utilizing layers effectively is a key skill to have in order to create efficient and fully editable graphics. If layers are not used effectively, it can be detrimental to the success of your project.

You have been hired to create a graphic design for Tom's Diner. The owner wants a BLT sandwich with sides as a graphic for the diner. He has supplied you with an image of a plate from the diner, as well as images of the ingredients for the sandwich. **You are to follow the directions given by the project manager to complete the project for the target audience.** There is also a PDF tutorial to help you complete this project. However, since this is the first project we will be completing in Photoshop, we will walk through this procedure together as a class.

The Entrepreneur In you

Find an image of a non-perishable food product (can, bottle, box). Create a spoof of the product and replace it's front label (for example, Raisin Brain Cereal instead of Raisin Bran Cereal). Up load it to Engel's Edmodo or on a USB drive and give to Engel.

26. Cover Model
You are going to be featured as the cover model for a popular magazine featured in our high school's library. Think of your favorite magazine and create a copy of it from scratch. Place your photo on the cover from the You Look Marvelous assignment. Add the magazine title and three feature stories headlines on the cover as well. The magazine should also include the current date, barcode, and pricing information. Above all, please remember that the magazine you select must be one that could be found in South Portland High School's library. Adult content, weapons, the use of drugs and/or alcohol are not acceptable.
The project you turn in must NOT be an existing cover where you just added your photo ... your project should be created from scratch.
