

# Día de aprender sobre los estados de México

Use these instructions and a device to gather necessary information for our end of Calendar unit assessments. Take all notes on WB p.59 **in Spanish**. Use resources as needed.

You will be assigned a state in Mexico. Use Google to locate your state on a map of Mexico. Note the **estado**, **capital**, and **región** on WB p.59.

Google “**What is the geography like in your state Mexico**”. Click on various sites & read until you have info to note on WB p.59.

Next Google “**What is the weather like in your state Mexico**”.

Scroll down the results until you see the link: <https://weatherspark.com>

This website will give you a yearly summary of high/low temperatures, typical weather, precipitation, etc. Use this information to fill out the **¿Qué tiempo hace?** section AND the temperatures on WB p.59. (We will NOT fill in the **actividades** section today.)

When WB p.59 is complete, you may do the following to learn more about your state:

- Visit various websites to read about your state
- Use Google images
- Use Google maps, satellite, street view to explore
- Use 360cities.net to see interactive panoramas of points of interest (you will need to search **(your state) Mexico**)

You may also visit this site to play interactive geography games and learn more about your state and others in Mexico:

- [http://www.sheppardsoftware.com/Mexico\\_Geography.htm](http://www.sheppardsoftware.com/Mexico_Geography.htm)

**\*\*\*\* return these instructions at the end of class \*\*\*\***

**\*\*\*\* be a good digital citizen while researching \*\*\*\***
