2011/12 Student Drop – Off/Pick-Up Procedures

Hundreds of students are dropped off in the 15 minutes before school starts. Drivers must be patient and students must exit vehicles in the drop off area **QUICKLY**.

For everyone's safety, please read these directions carefully.

Drop Off/Pick Up Procedures

When you drive your child to school there are **two efficient and safe ways to drop your child off:**

1. If you **intend to get out of your vehicle** for any reason, park in the parking lot. Walk your child into the building by crossing at one of the identified cross walks.
2. If you intend to drop your child off and **not leave your vehicle**, drive up to the curb along the building and have your child **quickly** exit to keep traffic moving. Then, follow the one way loop out of the parking lot.

Note:

Teachers pick up their students at 7:45am on the playground. Students arriving prior to the first bell at 7:45am **must walk around to the playground** and line up with their class.

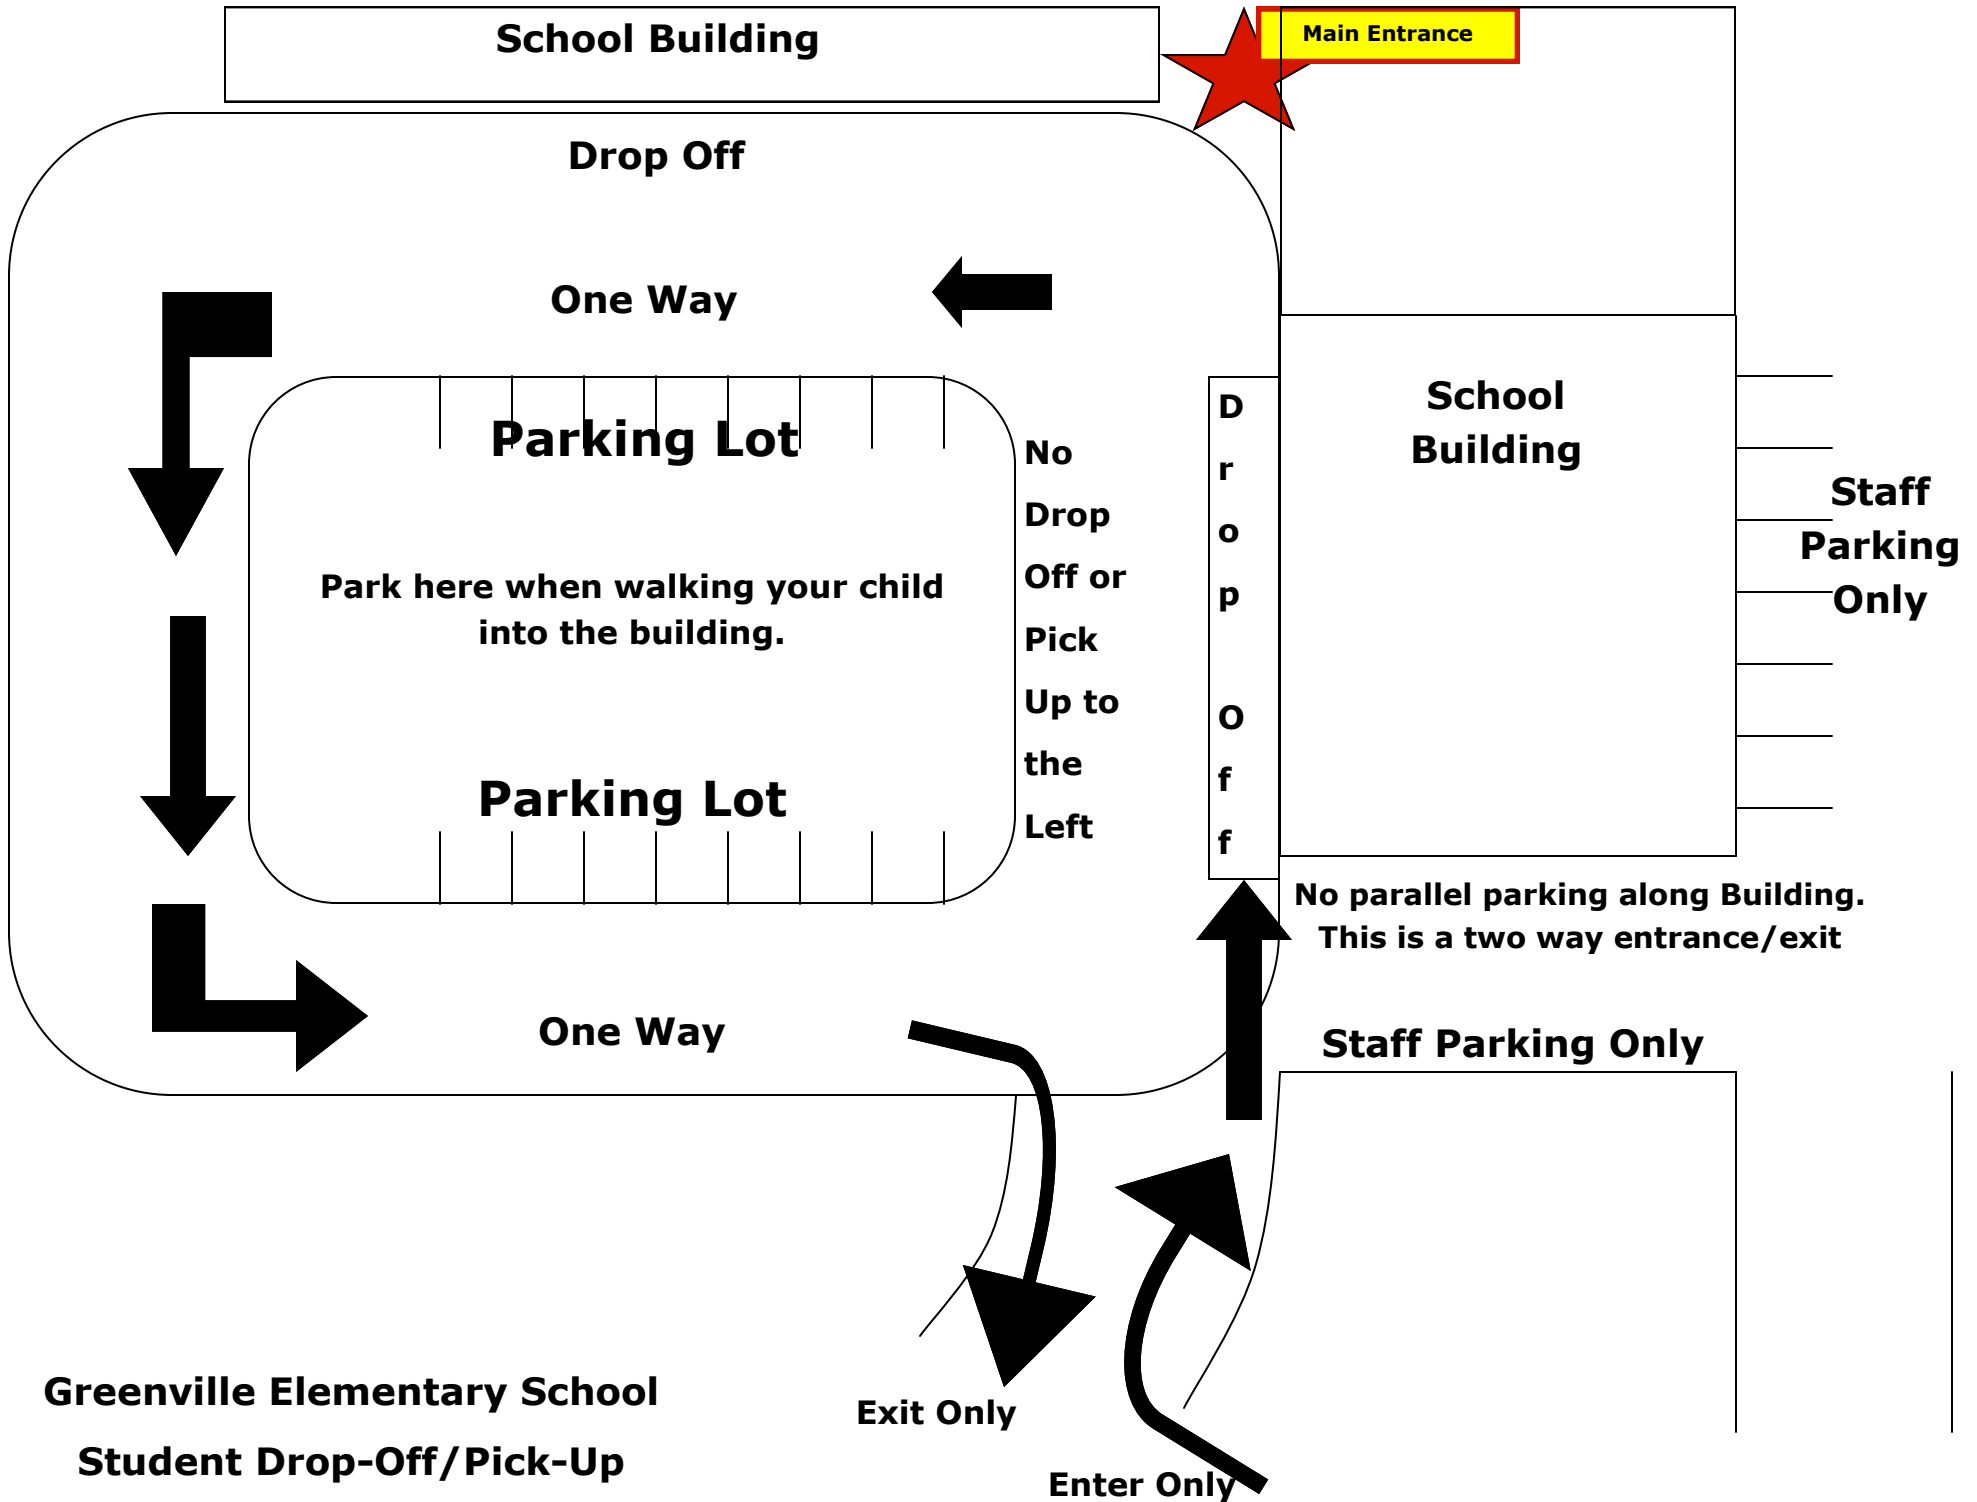

STUDENTS SHOULD:

Never be alone in the parking lot

Never walk between buses or cars

Always use the designated cross walks

Share this information with anyone who will be picking up or dropping off your child.
