

Computer Science and Coding Club

CS-GMS

Computer Science and Coding Club

5th-8th grade

Tuesdays, 3:15-4:30

Nov 12th -Apr 7th

This club will meet every other week at GMS. Opposite of the GMS Club, there will be a similar club in Hortonville at HMS.

CS-GMS is about having fun, being creativity, and learning through exploring. Learning about computer science and coding strengthens problem solving skills and logical thinking and supports key academic subjects such as science, math, and technology. Other benefits, such as learning about computational thinking, or developing expertise in coding, are secondary objectives and support the ISTE Standards.
