Bookshare

A BENETECH INITIATIVE

Bookshare is an ebook library that increases a student's accessibility and independence with reading. You can customize a student's reading experience to whatever is most successful for them despite visual impairments, learning disability, physical disabilities, or other reading barriers. It is the most extensive collections of accessible ebooks in the world. Bookshare makes reading easier for those with dyslexia, blindness, and many others by allowing them to customize and find almost any book they need. To gain access to Bookshare, a student must have an IEP or 504 and have a qualifying need.

This is a great tool available to our HASD special education students by giving them access to so many books. If they qualify, they have been given a username and password by the district. Case managers as well as many teachers have also been uploaded as sponsors so they can assign the books to the students.
