

## One-Less-Than Dominoes

### Materials:

A standard set of dominoes

### Players: 2-3

### How To Play:

Play dominoes in the usual way, but instead of matching ends (same number of dots with same number of dots), a new domino can be added if it has an end that is **one less than** the end on the board.

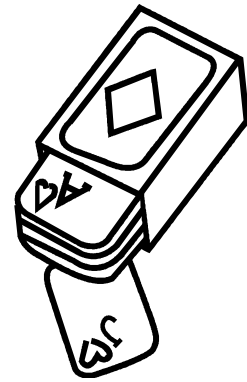

### Variations:

A similar game can be played for **two less, one more, or two more**.

## One-Less-Than, One-More-Than, Two-Less-Than, with Cards

### Materials:

Regular set of playing cards with face card removed.

### Players: 2

### How To Play:

1. Players first decide what form of the game they are playing: "one-less-than, or one-more-than, or two-less-than, etc..."
2. Place the cards in the middle of the two players. The players take turns turning over one card from the deck.
3. As soon as the player turns over the card, each player needs to determine what "one-less-than" the amount on the card is. For example, if a player turns over a "10", the first player to say, "9", gets that card. Then the other player turns over the next card, and so on.
