LETTER FROM

Dear Readers,

I am writing this magazine and putting it together for your entertainment and to get all your knowledge restored on soccer. I am going to try to show you what has happened in recent times about soccer. I will also have some awesome products and fun activities to look at, if you don't want to read that moment. I will try to include the best detail on my magazine. I believe that my magazine is the best magazine for soccer and the latest news on it. This magazine was designed by the best of the best to create the most amazing magazine that you have ever read. This magazine got many approvals for a lot of color and good articles. I hope you will enjoy this magazine that was made out of sweat and time. Thank you!

Like I said this magazine comes with many updated stories and it will help you understand what is happening in the soccer world. This magazine was produced by the best minds of the current day including: Andrew Yang, Zach Besaw, Bailey Bungert, Blake Kalwitz, Nick Ramierz, Dorsey Drehim, Adam Wege, Braden VanCamp, Michel Lorenze, and Leedong Xiong. With the help of all these awesome and amazing people I was able to put together one of the best magazines that has ever existed! This magazine is full of life and it brings out the wonderful things in this world even if you don't like soccer it is a good way to find out what is happening around the world. Your friends will think that you are really smart when you are telling them all about what is happening all around the world in soccer. It will also be helpful that you know all their scores and who is the best teams, so you can bet on certain teams to have the best luck of seeing who will win the next coming world cup.

The magazine has a bunch of updates on some payers that have quit or have gotten injured and are unable to play the amazing sport. This may be such a tragedy to players to work so hard to get to this area but they have managed to push through the pain and sorrow and get back on their feet. This magazine has many heart breaking and fun stories; also they talk about upcoming events and already happened. Anyway this magazine is bound to be a very good magazine and I promise if you are a serious soccer fan you will enjoy this magazine.

The top stories for this magazine are: "The Amazing Goal" By Michel Lohrenz. He says that this story is one of the most impressive things that he has seen in his whole life. He says he has enjoyed writing this story and he was totally astonished on what had happened. Also there is a story made by Bailey Bungert called "Soccer in Space" she said that this was an once in a life time opportunity and she would do it again and again without any hesitation.

I wanted to make this magazine because I have loved to play soccer ever since I could remember. I have played soccer ever since I was four years old, so I have played 10 years straight. I have been supported by many of my friends and my family that has helped me make some edits and they have helped me improve my magazine by a lot. I thank all the people have wrote amazing things for me because it has helped me so much and I will not forget all the helpful things you all have done for me. I will hopefully have the opportunity to write and make another magazine about the total history about soccer. This will be my next step to becoming a very popular selling magazine. I dearly hope you will enjoy this copy of soccer now and I really will like if you send me some likes or some recommendations. Thank you very much

THE EDITOR

and again I hope you enjoy the new edition
of soccer now!!

Sincerely,

Jacob Biese

Jacob Biese
Editor in Chief, *Soccer Now*

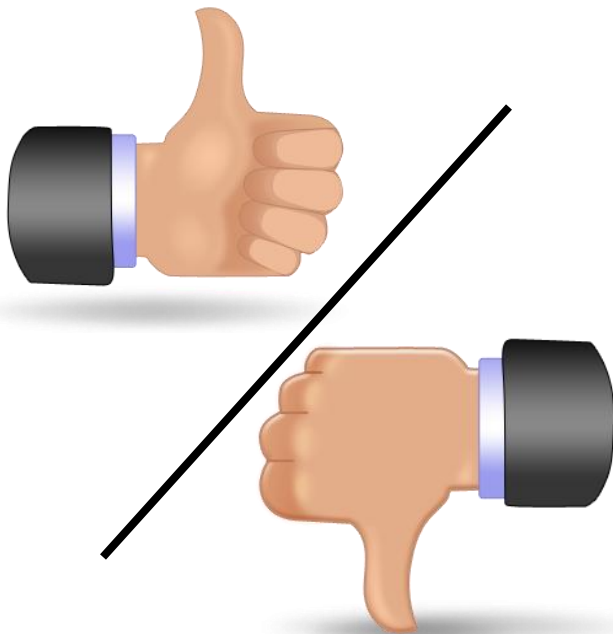

Dear Editor:

Thank You! You have helped me become an amazing soccer player. The Zero Gravity® cleats you have suggested me helped me score 4 goals! I am so glad this magazine has suggested me to buy the cleats! With the four goals I scored I helped lead our team to the state championship game! I will keep buying your magazine because of your tips and the motivation it gives me. I wish that I would have bought your magazine earlier so I could have been that much better. I will suggest these cleats and your magazine to all of my friends!

Sincerely,

Braden Van

Camp

Dear Editor:

The cleats you recommended broke the second day I wore them. I will never buy these cleats again, nor will I ever buy anything you suggest again.

The cleats may have cost little, but they were built very cheap. I would suggest to others that they pass on buying these cleats.

My friend Bob also bought the same exact cleats you suggested. After trying them out, he agreed with me that they are the worst cleats he's ever worn. He also said that he was never going to buy your magazine again because it is filled with horrible reviews and advice.

I suggest that you fix the problem before I take legal actions on you and your magazine company. I also suggest that this problem be fixed soon because if this ever happens again, I will stop my subscription and suggest to all my friends and family to not buy your magazine.

Love, Johnny Applecore

Amazing Goal
By: Mitchell Lohrenz

On April 24, 2013, there was a goal made by an amazing soccer player by the name of the Juber Janeb, of the Idaho Redskins. When the game was on the line in the eighty ninth minute, Janeb bicycle kicked a thirty foot goal, past the goalie Harris Phillips, of the Boston Pirates. Let's take you back to the game.

It's all tied up ladies and gentlemen as we head into the second half. We have had so many opportunities for goals. The redskins have had more shots on goal than the Pirates but we are still tied up, right now with sixty minutes left in the match Wayne Underland has the ball and is dribbling it up field, and he passes it to Hunter Inderman who takes it to the goalie box and tries a shot but is deflected by the goalie Harris Phillips. As the Pirates bring it up the field they pass it back and forth looking for the best shot, as the Pirates look for an open man, it is stolen by the one and only Juber Janeb who takes it up the field all by himself, it's a two on one not including the goalie, Janeb dribbles past the first defender, and the second defender, he might take it all the way, all he has to beat is the goalie. In the eighty ninth minute Janeb looks and has the ball again and passes it to Hunter Inderman who is waiting to pass it back to to Janeb who is looking for the ball, tries to bicycle it and.....
GOAL!!!!!!!!!!!!!!!!!!!!!!
GOAL!!!!!!!!!!!!!!!!!!!!!! GOAL!!!!!!!!!!!!!! Janeb comes through in the clutch and kicks a great bicycle kick to win the game. Janeb is definitely the hero of the game.

Back in the locker room, reporters are talking to Janeb, "What was going through your head as you kicked the game winning goal," Asks the reporter. "Honestly

I just wanted it to go in," stated Janeb. Thank you for your time and good luck next game, said the reporter

And that is how the game ended for Janeb, he went down in history as one of the greatest players of all time.

Soccer in space

By: Bailey Bungert

Have you ever played soccer? I bet almost all of you have, no matter where you are around the world, but most of you probably have never played it in space. Yes, it sounds impossible to be able to play soccer in space, but I tell you it is not. There has been a lot of research and practice to find the safest way to be in space and play soccer. After they have tried pretty much everything to be able to make it happen, almost giving up, they finally figured out the safest way to make it happen.

Men, Women and even children love the sport, not just because it is fun and enjoyable, but is a great way to stay in shape. Soccer is quite simple; with the main purpose to get the ball in the other team's net when you work together with your team. Out of all of the sport's most people play, a lot of them love soccer, it is very popular all around the world. Therefore, the scientists around the world have worked together to build a safe dome for the people to play in, in space. Many scientists have been very interested in trying to help out with the new soccer dome.

The dome is made of a highly protective fiberglass, plastic and see through metal mixed together to form the safest dome that is possible. The dome can handle any temperature of heat, and also any cold. So, if you are worried about the safety of you and your family; don't there is no point of worrying. Therefore, since it is very safe, you have the greatest opportunity to go to space and play one of the very popular sports right now!

One of the great choices that you have when you want to go to play soccer in space is that you can choose what planet you

would like to play on. Out of all of the planets, if you don't like any of them you can even go and play soccer on the sun. It takes longer and you have to be more careful. It is hotter there than anywhere else so it will be a little bit hotter in the dome. No matter what planet you choose to play on, they all are as safe as when you play soccer on earth. If you even want you can play on the moon, or any of the moons of any planet. If you are feeling a little home sick it would probably be better for you to play on the moon.

How do we get there you may ask? Well it is quite simple; first you go to your nearest airport and ask them to speak to the space manager. After that the manager will give you a pass to go to the front desk to pay for your ticket, next someone will show you to the specially made air craft that travels by teleporting through space. It is the safest and fastest way unless you want to be very old once you come back for space. It depends on how long you stay on a planet, what planet you are going to, to what the price of the ticket will be.

You also might be wondering if you have to wear a protective suit when you play. Well you don't, since you are in a safe dome there is no reason to have to wear a space suit. All you have to wear when you play soccer in space is a warmer or cooler jersey; it depends on the planet. If it is a colder planet and the sun isn't around to help keep you warm then it is best to dress in a thicker jersey, or vice versa. For shoes you can just wear your normal cleats you wear when you play on Earth.

When you are in the dome there is oxygen to breathe, trees to see, and all around is grass covering almost every inch. At each field there is a snack shack just in case you get hungry or thirsty. Anyway, the

fields that are played on are made of grass, but not just normal grass; it is specially made grass of a mixture of real grass with plastic grass. Which, lets the grass last longer and there is not much water needed, it still feels like real grass. Therefore, you cannot tell that is not 100% grass unless you read this article or ask someone on the planet. On all of the planets the amount and size of the fields vary; on Jupiter the fields are very large, and it has many different ones to play on. Whereas, on Mercury, there are not as many fields and the fields are smaller.

Ever since people have started to go onto the planets to play their favorite sport, or just to watch a loved one play, they have loved it. Being able to go to another planet is a great opportunity for any age of person. You never know what you may see when you're on another planet!

For more information, or questions call 1-800-234-PLAY or email us at SoccerSpace@aol.com.

2012 Soccer Draft

By: Zach Besaw

In almost every professional league sport there is a draft. A draft is where teams choose players one at a time, starting with the players who are most wanted. The players are drafted in rounds. In a draft, the team that chooses first is the team that had the worst record in the past season. For example, if a team won the championship in football, they would be the last to pick in the draft because they already have a really good team in place. In soccer, the professional league is MLS. It stands for Major League Soccer. The players in the draft can also be former college players. The players want to get drafted because it will give them a chance to shine in the professional leagues.

In soccer, the professional league is called "MLS," or Major League Soccer. A young player named Harry Jakcol wants to be drafted by the MLS. Harry is an African American. He is currently one of the best soccer players. He was first in state from 1st grade to 8th grade, was on the varsity soccer team throughout High School, and was on the Veloskin Aligators, a college pro team in the United States. Harry would like to be drafted to the L.A. Galaxy team because they have David Beckham, a great soccer player. If he doesn't get drafted to the L.A. Galaxy Team, he would be happy on any other Major League Soccer team. Harry is also hoping to be a first round pick.

It is the day of the 2012 Soccer Draft and there are many people. Harry is watching the other players and comparing himself to them. He thinks that he looks as athletic as most of the players. The soccer draft is a very organized day. Harry is sat at a table as soon as he walks in. He was told to sit there and wait until his name is called. Then he is to go up on the stage, give a speech on live television, shake the coach's

and the commissioner's hand, and receive his brand new jersey from the team that drafted him.

As Harry was waiting, an announcer said, "The 2012 Soccer Draft has begun." The draft was going to take a long time because the teams were going slow for their picks. They wanted to choose the right players. There was going to be 32 rounds with 36 teams around the U.S. There were speakers all around the room and HD television screens so the players could hear and see who was chosen. There were also big billboard screens that had the results of every round for every team. The billboard screen was an organized system that also had the player's college team listed.

Harry was not chosen in the first round and was hoping to be chosen in the second. Harry was getting rather impatient as he waited. He passed the time by eating and texting his family and friends to keep them updated on the days events. Finally, the moment Harry had been waiting for came, his name was announced! Harry was chosen in the second round of the draft! A burst of excitement went through his body. He was on the L.A. Galaxy Major League Soccer team! Harry ran up to the stage. He said in his speech how excited, lucky, and delighted he was about being on the L.A. Galaxy. He also said his goal was to be a starter.

After the draft, Harry went and met all of his teammates at a conference meeting. The conference meeting took place the day after the draft. The players all had a great time because they got to meet their new teammates. The coach said that their goal was to win the championship for the second time in a row. The coach then had a private talk with each player because he wanted to learn more about them and what their strengths were. The first practice was held later in the day. Harry thought that he wasn't as good as everyone else because he

was a rookie. The first practice turned out ok for him but he knew he had a lot of work to do.

In the end, all of the fans were happy that Harry was drafted to the L.A. Galaxy soccer team. They felt good about him as a person and a player. Hopefully Harry has a really good season. The best of luck goes out to him.

Super Soccer

By: Andrew Yang

Soccer season is back, and to be the best at soccer you have to beat the best. To beat the best you need to have the best equipment, what you are missing is the best drink to keep you going the full ninety minutes. Yang Corporations designed and tested their new sports drink specially designed for soccer players. The new drink is called PowerMax.

PowerMax is scientifically proven to help you exceed your expectations and play the full ninety minutes of a soccer game. With PowerMax you will be able to attain a surplus amount of energy. Also if you are feeling tired or slow you can drink a bottle of PowerMax to replenish your energy.

We only recommend PowerMax for soccer players because it won't have the same effects on other sports players as it would on soccer players. That reason is because soccer players exert a different type of energy used than other sports players do. Yang Corporations is currently trying to create a new sports drink for all types of sports. Until then you soccer players better enjoy your new found energy design specifically for you. With that information stated you can guarantee that we are not ripping you off. You can trust us that our product will replenish your energy and keep you energized because we spent so much time trying to perfect the intricate formula that will help your team persevere and win the championship!

All you have to do is quench your thirst with this amazing power drink, wait one minute then you will feel an immense amount of adrenaline flow through your veins.

“This is the most amazing energy drink ever! It worked literally seconds after I had drunk it. It gave me an incredible feeling inside and helped me go for the full ninety minutes of my game,” stated professional soccer player Renaldo Lopez.

If you would just try PowerMax I guarantee you will not be disappointed and you will be happy with the results it offers you. Millions have bought our product and I promise not a single one of them has been disappointed about PowerMax.

The patented formula is a makeup of the best and most fresh fruits, which makes it contain helpful vitamins and minerals. That also means that no matter how much bottles you drink you will not receive any crashes, although we only recommend one bottle per person.

If you are not sold yet you will just have to try it out for yourself. Buy it now at your local drugstore or sporting goods store! You can also order it off our website at www.PowerMax.com and you will receive it within one to two business days.

Here is what verified buyers though of our product.

“Thank you for this new product it really did help me” –Matt Roberts.

“Oh I just love this drink it tastes so amazing and gives a substantial amount of power”—Emily Johnson

“I play a lot of sports including soccer and I recently purchased one of these drinks and I am truly impressed. Please make it for the other popular sports out there pronto!” –John Jackson

Just take my word on this, I promise
you will not regret it! Hurry while the
supplies last because they are selling like
hotcakes!

Great Ways to Stay in Shape

By: Deven Young

How many people run out of ideas about how to stay healthy? If you are one of those people, then this is the article for you!

Exercise is an excellent way to stay in shape, and can give you self confidence. Even if you don't have time to go to a fitness center, there are many exercises you can perform at your house. You could do some sit-ups, where you lay down and then lift your head up to your knees, giving you an excellent abs workout. If you have a broom in your house you can place the broom across your shoulders, firmly plant your feet, and rotate the upper section of your body for yet another great abs workout. You could get down and do a few pushups every time there is a commercial on the television.

A good way to keep the extra weight off is to eat healthy. Those who lose weight quickly and diet routines don't work as well as taking your time, and working out and dieting properly. Eating proportionally is a key essential for dieting in a safe and comfortable way. Many Americans overeat and have stretched out stomachs, but this problem can be fixed by not eating as much junk food and eating fulfilling meals. Looking online to find the food pyramid to find out what proportions you should eat and drink is a good way to know you're not eating too much. Many Physicians work together to make sure the data on their site isn't wrong. You might need to change your diet a little to support your body if you're a little larger than the average human because every human is different.

Another good way to stay in shape is to go for long walks to strengthen your legs and tone your abs. Many people walk and it is good exercise for your body but be

careful not to overdo it and walk too far away from your house! When walking always bring a water jug in case you get thirsty while not near a water source. Always keep a cell phone on you when walking or jogging in case of an emergency. Many humans enjoy bringing their pet dog or listening to their musical device while walking to walk to the rhythm.

Another way to stay in shape is to do some yard work. Redesigning your yard can be an exercise full, but expensive hobby. Maybe you can add a nice garden that you have always wanted. It might not seem like it but digging up the soil in your back yard can be rigorous exercise. Then picking out the unwanted rocks from the soil (if any) will cause you to constantly bend your legs to pick up the rocks, strengthening your legs and hamstring. Also by bending down to place the seeds is also strengthening your leg muscles.

Another way to keep in shape is to work on vehicles. Working on your car will have you lifting parts all day not to mention you have to lift with your legs to lift the heavy parts. Also when under the vehicle, lifting the parts from the bottom is like benching weights.

Another more obvious way to stay in shape is to go to the gym. Although going to your local gym often requires a fee for using the equipment, you can be in tip top condition in a few months. A good idea would be to hire a personal trainer because they help you push your boundaries to gain that extra muscle. When going to the gym you can exercise every muscle in your body with the exercise equipment, but make sure you know how the equipment works before rushing in and using the exercise equipment otherwise you could end up leaving with a serious injury!

Another expensive way to stay in shape is believe it or not, shopping. By shopping, you are carrying around your items and constantly lifting items to add to your cart or bag. By shopping you are getting a great arm workout.

Tragic Loss

By: Blake Kalwitz

The Tadenville Dynamos suffered a tremendous loss during their match against Fannegas Armadillos on Sunday. All-pro goalie, Dwayne Shumman torn his ACL and MCL while trying to save a kick that came off the foot of Henry Johnson. When Shumman lunged for the ball he said that he heard a tearing noise like someone was shredding paper. The pain was instant and excruciating, when he hit the ground he was yelling and squirming on the field in pain, the trainers were helping him onto a golf cart and he was carted off the field in the forty-third minute of the championship game.

The injury leaves many soccer fans biting their fingers because a similar incident two years ago left up and coming rookie, Jamar Willison sidelined for not only the rest of the season, but the rest of his career. Although it's unfortunate that the best goalie in the game sustained such a devastating injury, there is one plus that comes out of the situation, the Dynamos drafted international star, Jozy Armiro. The organization picked Armiro with the first overall pick in the 2007 draft in hopes that he would be the next Dwayne Shumman. Armiro had been mentored by Shumman for the first two seasons of his career and was really showing progress, so now with the injury of Shumman, the Dynamos will see what Armiro is really made of. Even though the Dynamos made it to the championship match this year, they have holes all over their lineup, their top three goal scorers all have expiring contracts and are expected to change scenery in order to get paid big dollars.

Despite the fact that Tadenville can move forward with the next up and coming

goalie in Armiro, there will never be another Shumman. He has meant so much to the sport of soccer and was not only a great player, but a great man. Manager, Charlie Kanuk stated that Shumman was the greatest goalie the league had ever saw. He was quoted saying, "I have never coached a goalie, a player for that matter, that has as much drive as Dwyane and I don't think I ever will again." The Dynamos love what they have in Armiro, but you bet that they'd love to have Shumman back next season.

Soccer Quiz

1. Which position's job is to score goals?
 - a. forward
 - b. midfielder
 - c. defender
 - d. both a and b

2. Which foul is the worst?
 - a. red card
