

Hortonville

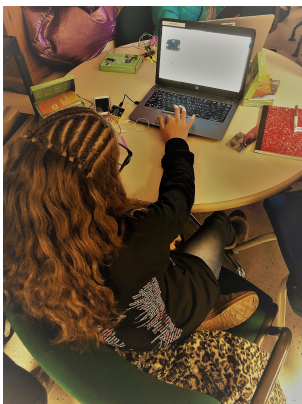

BEGINS: Monday, Nov. 13, 3:00—4:30 p.m. HMS C118 Lab

- Join us on **Monday, November 13**, to learn about Hortonville's *Girls Who Code* Club!
- Preview *Girls Who Code* and the activities you will complete during club meetings.
- Engage in hands-on activities to create, learn, collaborate, and become inspired.
- Code with Sphero. Develop with Scratch. Program Micro:Bits, AdaFruits, and robots!
- Are you a high school student? Join *Girls Who Code* as a mentor. GWC mentors will earn credit for their volunteer service hours. No experience needed!

GWC OVERVIEW

Girls Who Code encourages girls to impact their community in a positive way through code. Girls **engage** in fun and simple online coding tutorials, **build** community through hands-on, interactive activities, and **learn** about inspiring role models and opportunities for women to code. Girls collaborate in teams to create projects and solve real world problems.

★ Parents: Please visit <https://girlswhocode.com/about-us/> to learn more information and discover reasons why girls should learn to code.

? Questions?: Contact Ms. Miller at penelopemiller@hasd.org.

Hortonville

2023-2024 GWC MEETING SCHEDULE:

Mondays: 3:00 – 4:30 p.m. HMS C118 Lab

November 13

December 11

January 15

February 12

March 11

April 8

May 6

SISTERHOOD.

A safe, fun, and supportive environment for girls to learn computer science.

CODE.

The basis for all programming languages: loops, variables, conditionals, and functions.

IMPACT.

An opportunity to identify and solve real-world problems through code.
