LETTER FROM THE EDITOR

Hi, My name is Alec and welcome to another issue of Retro Magazine. The purpose of this magazine is to inform the new age about the history that the newer games went through. The old games had a lot of gems like super mario bros or sonic the hedgehog. At the moment you can't go to a retail store and pick up a NES and super mario bros. but you can get an emulator and play these games as rom files. There was a lot of work that went into making this magazine about the older games.

Around 90% of a months worth of work went into this magazine. The other ten 10% was procrastination.

But its all done now, and i present to you... Retro Magazine, The only magazine that brings you back to the past!

Credit to everyone listed below (And some others) for contributing to this magazine.

Retro Gaming Apparel!

Now you can wear all of
your favorite video game
characters!

GAMES INCLUDE MARIO, POKEMON,
LEGEND OF ZELDA, AND METROID!

shirt - 7.00\$

hat - 5.00\$

sweatshirt - 15.00\$

plus shipping and handling

Game Genie

The Game Genie is a tool in which you type in a 6 letter code like PIGPOG, or YEAAAA then the game genie would scramble up the games file to make funny things happen like Goomba meteors in Super Mario Bros.

It also had a lot of practical uses as well like changing the music. Here is some effects that can happen when using the Game Genie

(It can also be very destructive)

Code: YEAAAA

Code: VZTLTN

THE BOX OF

RANDOM!

ANYTHING COULD BE INSIDE!

Frustratingly addictive with even more frustrating music, Tetris has been annoying people since 1985.

Tetris is a game in where shapes made out of squares fall into a rectangular area, where they pile up on top of each other. You can rotate, move, and bring down the shapes with the arrow keys. You can rotate them with the up arrow, move them left and right with the left and right arrow keys, and move them down faster with the down arrow. Once a shape touches the top of the area, the game is over. When you make a row of the blocks, the row disappears, making it so you can play for practically forever.

The shapes that fall are made up of four squares put together to form one of seven shapes. The colors of the shapes are pink, red, orange, green, light blue, dark blue, and white.

Although Tetris is an incredible game, there is one thing about it that most people hate. The music. The Tetris theme song is one of the most complained about songs on the internet. It is high-pitched and nearly impossible to get out of your head. Besides that, it is actually quite catchy.

So, all in all, Tetris is an overall great game that people can both hate and love at the same time. It is one of the simplest games, yet it has managed to frustrate almost everyone who plays it.

Get the boxtop!

Corruption

Corruption is when the game gets scrambled up

Corruption happens when a game doesn't know how to handle something. Corruption will look something like this.

1 This was forced

Corruption can either be bad;

Or Funny;

Parts of a NES game

1. Sound

Sound is made by a machine and sound engineers. In a common NES game the sound is made in 8-bit.

2. Graphics

Graphics are made by an artist. Graphics are a very important part of any game. The graphics in a NES game are normally Pixelated.

3. Game Mechanics

Game mechanics are the logic in a game. Things like how fast the game is and what you do in it are parts of the Game Mechanics.

4. Title

It's the name of the game. A good title should define what the goals are or how you get there.

5. Ratings

Not always true but normally a good indication of how good a game is. (Or how bad it is)
