Hunger Report

Did you know that 13 million children in the United States live in "food insecure" homes?

Food Insecurity = may not have consistent access to enough food

Food insecurity isn't a hunger problem; it's a health problem, an education problem, and a problem that everyone should be paying more attention to. The effects of food insecurity can last a lifetime and children shouldn't have to manage that.

In Wisconsin, 530,500 people are facing hunger - and of them 179,160 are children!
